- **Frameworks:** Express, Node.js, React, Next.js, Bootstrap.
- **Tools:** Git, Render, REST API Integration, vercel.
- **Database:** MySQL, MongoDB

Projects

HealthWise – AI-Powered Health Guidance Platform LINK
• Developed an AI-based web app that provides health insights and nearby hospital suggestions using pincode.
• Built with Next.js, Node.js, and MongoDB, integrating AI for symptom analysis and location APIs for hospital search.
• Implemented disclaimer popup and clean UI for ethical, user-friendly health guidance.
Wanderlust – Full-Stack Web Application LINK
• Built an Airbnb-inspired web app using React, Node.js, Express, and MongoDB.
• Implemented user authentication, property listing creation, search & filter, and booking functionalities.
• Designed a responsive UI with EJS and Bootstrap for seamless user experience.
• Integrated cloud-based image storage using Cloudinary and deployed the app on Render.
Portfolio Website – Personal Branding
• Developed a responsive personal portfolio using React, HTML, CSS, and JavaScript.
• Showcased projects, technical skills, and resume with an interactive and minimal UI/UX design.
• Integrated a functional contact form and smooth navigation for enhanced user experience**.**

Leadership & achievements section

Served as Assistant Manager during graduation, leading a small team and improving operational efficiency.
